

A graphic featuring a purple protein ribbon structure on the left and a blue and white DNA double helix on the right, set against a dark background with a grid of small grey spheres.

BIOCHEMISTRY BOOT CAMP 2022

DATES:
JUNE 6-8

WHO:
All grads & undergrads
doing summer research

WHAT:
Computational tools
for biochemistry

WHY:
To be the best scientist
you can be

Are you ready to take biochemistry to the next level? Looking for that “wow” factor in your research poster?

BIOCHEMISTRY BOOT CAMP will cover molecular graphics, BLAST, model fitting, citation tools, PCR primer design, UNIX, and more. Additional sessions cover lab notebooks and chemical safety.

TRAVEL GRANTS AVAILABLE. Registration is free, and eligible students can receive travel support. To apply, contact nfitzkee@chemistry.msstate.edu or visit the website. Supported by the National Science Foundation.
